ORGANIZATIONAL JOINERY

Operating-model design • Commercial operations • Cross-functional execution

Strong teams. Broken joints.

When companies outgrow informal coordination, execution starts breaking between teams, decisions, systems, and people. Organizational Joinery diagnoses those interfaces and installs just enough structure to help the business move again.

WHERE I HELP

01 Operating model & organizational design
Roles, decision rights, escalation paths, ownership, and handoffs.

02 Business & commercial operations
Pricing, forecasting, revenue processes, lifecycle, and resource allocation.

03 Management systems
KPIs, dashboards, reviews, planning rhythms, and accountability.

04 Cross-functional transformation
High-stakes initiatives across Product, Sales, Operations, Finance, and leadership.

05 AI-enabled workflow redesign
Repeatable workflows that reduce administrative friction while preserving judgment.

HOW I WORK

01 DIAGNOSE
Find where decisions, information, or ownership break.

02 DESIGN
Build the minimum viable operating mechanism.

03 INSTALL
Work alongside the team through adoption and iteration.

BUILT FROM OPERATING INSIDE COMPLEX BUSINESSES

Founded by Riley Hall, a mechanical engineer and MBA-trained senior operator with experience spanning venture ecosystems, digital manufacturing, industrial automation, commercial leadership, and organizational transformation.

VENTURE ECOSYSTEMS
Decision rights, escalation, and management rhythms designed; select elements implemented.

DIGITAL MANUFACTURING
Cross-functional GTM work contributing to 280% customer-acquisition growth.

INDUSTRIAL AUTOMATION
$10M+ enterprise opportunities developed; RFQ response efficiency improved 50%.

COMMERCIAL LEADERSHIP
Regional book grew $100K to $3.3M; separate territory grew 112% to $5.4M.

WAYS TO ENGAGE

Fractional operating leadership • 30–90 day operating resets • Project-based transformation • Embedded strategic initiatives
